Project Abstract

On this competitive 8(a) project, for the Department of Defense, Team Henry has been tasked with the provision and operation of specialized marine equipment, ancillary attachments and Certified Crane Operator to assist the NAVFAC Wharf Builders Division in the maintenance, repair and reconstruction of damaged mooring facilities for the Sixth Atlantic Fleet, Headquartered at the United States Naval Station, Norfolk VA and surrounding facilities in the Tidewater area.

To accomplish this task Team Henry has entered into a formal Teaming Agreement with Hampton Roads Leasing, Inc. for the provision of the necessary barge mounted floating cranes, and ancillary equipment as specified by NAVFAC.

In addition, primary Team Henry responsibilities also include all Project Management, Quality Control Management, Accident Prevention Planning per EM 385-1-1 with associated Activity Hazard Analysis, Daily Supervision and project reporting.

The strategic importance of this project can not be underestimated, as these mooring facilities accommodate US Warships from Submarines to Enterprise Class Aircraft Carriers.

Team Henry is proud to be a participant in this significant defense contract.
